

Stop paying people to retype things.

I build internal tools that turn a form into a finished document, filed and logged, inside your own Google account. One payment, no seats, no monthly fee.

Documents

Contracts, quotes, invoices and reports that number and file themselves.

Field work

Photo uploads, attendance and proof of work routed to the right folder.

Records

Registers and schedules your team can still edit by hand in Sheets.

One link

A branded portal so staff open one address, not a raw script URL.

THE PROBLEM

Three tasks quietly eat the week

Retyping the same document. Hunting for the file someone saved in the wrong place. Chasing proof of what was actually done. None of it needs a person, and all of it gets blamed on being busy.

Before

- 1. Open last month's file and edit the names
- 2. Renumber by hand and hope it is unique
- 3. Save it somewhere, send it by chat
- 4. Look for the ID photo three weeks later
- 5. Rebuild the month from WhatsApp at closing

After

- 1. Fill one form on a phone
- 2. Number is assigned automatically
- 3. Document and PDF are created and filed
- 4. ID and payment proof sit in the same folder
- 5. One register sheet links to everything

Measured on a live operation

TASK	BEFORE	AFTER
Issue a rental agreement	20 to 30 minutes	About 2 minutes
Find a signed contract	Minutes of searching	One link in a sheet
Monthly spend evidence	Scroll chat history	Already filed by category

HOW IT WORKS

Four steps, fixed price first

1. **Map the process.** You describe what is typed twice. I return the fields, folders, the finished document, and a fixed price.
2. **Build.** Templates, numbering, folder structure and access codes.
3. **You test.** Installed in your own Google account with test data.
4. **Handover.** Setup guide in plain language, source code, and 14 days of fixes included.

What you own at the end

The code

In your Apps Script project, under your account.

The data

Sheets and Drive folders you control.

The documents

Templates you can edit without a developer.

The guide

Step by step, so your team runs it without me.

PRICING

Pay once. Subscription optional.

PACKAGE	SCOPE	DELIVERY	FROM
Starter	One automation: form, sheet, automatic document or log	3 days	\$75
System	Full module with register, folders, access codes, guide	7 days	\$220
Operation	Several tools, branded portal, templates rebuilt, handover	14 days	\$550

Care plan, optional

\$25 per month for fixes, small changes and priority replies.

Cancel any time. Without it, changes are quoted per job. Nothing stops working if you cancel, because the tool runs on your account, not mine.

Also available

Point of sale and order taking, booking sheets, stock tracking, approval flows, and connections to tools you already pay for.

Try it before you talk to me.
